

Hawley Primary School

Power Maths calculation policy, KS1

The following pages show the *Power Maths* progression in calculation (addition, subtraction, multiplication and division) and how this works in line with the National Curriculum. The consistent use of the CPA (concrete, pictorial, abstract) approach across *Power Maths* helps children develop mastery across all the operations in an efficient and reliable way. This policy shows how these methods develop children's confidence in their understanding of both written and mental methods.

KEY STAGE 1

Children develop the core ideas that underpin all calculation. They begin by connecting calculation with counting on and counting back, but they should learn that understanding wholes and parts will enable them to calculate efficiently and accurately, and with greater flexibility. They learn how to use an understanding of 10s and 1s to develop their calculation strategies, especially in addition and subtraction.

Key language: whole, part, ones, ten, tens, number bond, add, addition, plus, total, altogether, subtract, subtraction, find the difference, take away, minus, less, more, group, share, equal, equals, is equal to, groups, equal groups, times, multiply, multiplied by, divide, share, shared equally, times-table

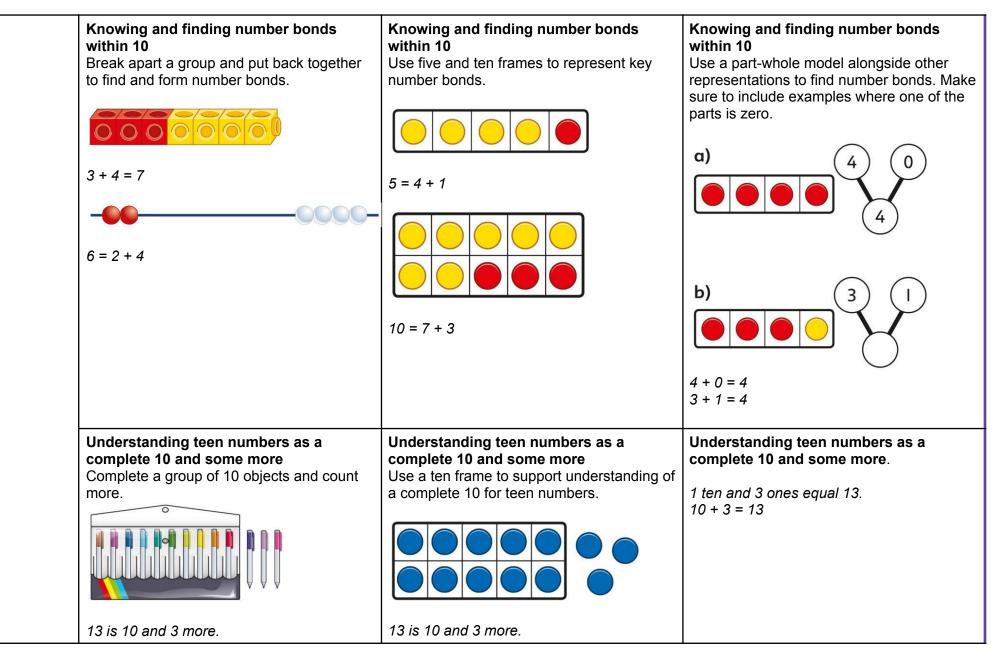

-		
Addition and subtraction: Children first learn to connect addition and subtraction with counting, but they soon develop two very important skills: an understanding of parts and wholes, and an understanding of unitising 10s, to develop efficient and effective calculation strategies based on known number bonds and an increasing awareness of place value. Addition and subtraction are taught in a way that is interlinked to highlight the link between the two operations. A key idea is that children will select methods and approaches based on their number sense. For example, in Year 1, when faced with 15 – 3 and 15 – 13, they will adapt their ways of approaching the calculation appropriately. The teaching should always emphasise the importance of mathematical thinking to ensure accuracy and flexibility of approach, and the importance of using known number facts to harness their recall of bonds within 20 to support both addition and subtraction methods. In Year 2, they will start to see calculations presented in a column format, although this is not expected to be formalised until KS2. We show the column method in Year 2 as an option; teachers may not wish to include it until Year 3.	<text><text><text><text></text></text></text></text>	Fractions: In Year 1, children encounter halves and quarters, and link this with their understanding of sharing. They experience key spatial representations of these fractions, and learn to recognise examples and non-examples, based on their awareness of equal parts of a whole. In Year 2, they develop an awareness of unit fractions and experience non-unit fractions, and they learn to write them and read them in the common format of numerator and denominator.

	Concrete	Pictorial	Abstract
Year 1 Addition	Counting and adding more Children add one more person or object to a group to find one more.	Counting and adding more Children add one more cube or counter to a group to represent one more.	Counting and adding more Use a number line to understand how to link counting on with finding one more.
			one more
		One more than 4 is 5.	One more than 6 is 7. 7 is one more than 6.
			Learn to link counting on with adding more than one.

Adding by counting on Children use knowledge of counting to 20 to find a total by counting on using people or objects.	Adding by counting on Children use counters to support and represent their counting on strategy.	Adding by counting on Children use number lines or number tracks to support their counting on strategy. 7 7 7 7 7
Adding the 1s Children use bead strings to recognise how to add the 1s to find the total efficiently. 2+3=5 12+3=15	Adding the 1s Children represent calculations using ten frames to add a teen and 1s. 2 + 3 = 5 $12 + 3 = 15$	Adding the 1s Children recognise that a teen is made from a 10 and some 1s and use their knowledge of addition within 10 to work efficiently. 3 + 5 = 8 So, $13 + 5 = 18$
Bridging the 10 using number bonds Children use a bead string to complete a 10 and understand how this relates to the addition. 7 add 3 makes 10. So, 7 add 5 is 10 and 2 more.	Bridging the 10 using number bonds Children use counters to complete a ten frame and understand how they can add using knowledge of number bonds to 10.	Bridging the 10 using number bonds Use a part-whole model and a number line to support the calculation. 4 1 3 9 4 1 3 9 4 1 3 9 4 1 1 3 9 4 1 1 1 1 1 1 1 1

Year 1 Subtraction	Counting back and taking away Children arrange objects and remove to find how many are left. 1 less than 6 is 5. 6 subtract 1 is 5.	Counting back and taking away Children draw and cross out or use counters to represent objects from a problem. ••••••••••••••••••••••••••••••••••••	Counting back and taking away Children count back to take away and use a number line or number track to support the method. 876 0 1 2 3 4 5 6 7 8 9 10 9 - 3 = 6
	Finding a missing part, given a whole and a part Children separate a whole into parts and understand how one part can be found by subtraction. $\downarrow \qquad \downarrow \qquad \downarrow \qquad \downarrow$ $\downarrow \qquad \downarrow \qquad \downarrow \qquad \downarrow$ $\blacksquare = 5 = ?$	Finding a missing part, given a whole and a part Children represent a whole and a part and understand how to find the missing part by subtraction. 5 - 4 = 1	Finding a missing part, given a whole and a part Children use a part-whole model to support the subtraction to find a missing part. 7 - 3 = ? Children develop an understanding of the relationship between addition and subtraction facts in a part-whole model.

Finding the difference Arrange two groups so that the difference between the groups can be worked out.	Finding the difference Represent objects using sketches or counters to support finding the difference.	Finding the difference Children understand 'find the difference' as subtraction.
Image: Second system Image: Second system <td< td=""><td>5 - 4 = 1 The difference between 5 and 4 is 1.</td><td>$\begin{array}{c} & & & \\ & & & \\ 0 & 1 & 2 & 3 & 4 & 5 & 6 & 7 & 8 & 9 & 10 \\ 10 - 4 = 6 \\ The difference between 10 and 6 is 4. \end{array}$</td></td<>	5 - 4 = 1 The difference between 5 and 4 is 1.	$\begin{array}{c} & & & \\ & & & \\ 0 & 1 & 2 & 3 & 4 & 5 & 6 & 7 & 8 & 9 & 10 \\ 10 - 4 = 6 \\ The difference between 10 and 6 is 4. \end{array}$
Subtraction within 20 Understand when and how to subtract 1s efficiently.	Subtraction within 20 Understand when and how to subtract 1s efficiently.	Subtraction within 20 Understand how to use knowledge of bonds within 10 to subtract efficiently.
Use a bead string to subtract 1s efficiently. 5 - 3 = 2 15 - 3 = 12	$ \begin{array}{c} \hline \hline $	5 - 3 = 2 15 - 3 = 12
Subtracting 10s and 1s For example: 18 – 12 Subtract 12 by first subtracting the 10, then the remaining 2.	Subtracting 10s and 1s For example: 18 – 12 Use ten frames to represent the efficient method of subtracting 12.	Subtracting 10s and 1s Use a part-whole model to support the calculation.

	Subtraction bridging 10 using number	First subtract the 10, then subtract 2. Subtraction bridging 10 using number	$ \begin{array}{c} (14) \\ 19 - 14 \\ 19 - 10 = 9 \\ 9 - 4 = 5 \\ \text{So, } 19 - 14 = 5 \\ \end{array} $ Subtraction bridging 10 using number
	bonds For example: 12 – 7 Arrange objects into a 10 and some 1s, then	bonds Represent the use of bonds using ten frames.	bonds Use a number line and a part-whole model to support the method.
	decide on how to split the 7 into parts. Image: Constraint of the formation o	For 13 – 5, I take away 3 to make 10, then take away 2 to make 8.	13-5 2 3 -2 -2 -3 5 6 7 8 9 10 11 12 13
Year 1 Multiplication	Recognising and making equal groups Children arrange objects in equal and unequal groups and understand how to recognise whether they are equal.	Recognising and making equal groups Children draw and represent equal and unequal groups.	Describe equal groups using words <i>Three equal groups of 4.</i> <i>Four equal groups of 3.</i>
	Finding the total of equal groups by counting in 2s, 5s and 10s	Finding the total of equal groups by counting in 2s, 5s and 10s	Finding the total of equal groups by counting in 2s, 5s and 10s

	There are 5 pens in each pack 510152025303540	100 squares and ten frames support counting in 2s, 5s and 10s. 1 = 2 + 3 + 5 + 6 + 7 + 8 + 10 + 10 + 10 + 10 + 10 + 10 + 10	Use a number line to support repeated addition through counting in 2s, 5s and 10s. 10 10 10 10 10 10 10 10 10 10 10 20 30 40 50
Year 1 Division	Grouping Learn to make equal groups from a whole and find how many equal groups of a certain size can be made. Sort a whole set people and objects into equal groups.	Grouping Represent a whole and work out how many equal groups. There are 10 in total. There are 5 in each group. There are 2 groups.	Grouping Children may relate this to counting back in steps of 2, 5 or 10.
	Sharing Share a set of objects into equal parts and work out how many are in each part.	Sharing Sketch or draw to represent sharing into equal parts. This may be related to fractions. Image: Sharing parts of the second state of	Sharing 10 shared into 2 equal groups gives 5 in each group.

Subtracting a 2-digit number	Subtract by taking away.	Subtract the 10s and the 1s. This can be represented on a 100 square. $\begin{array}{rrrrrrrrrrrrrrrrrrrrrrrrrrrrrrrrrrrr$	Subtract the 10s and the 1s. This can be represented on a number line. 700 -10 -10 -10 -10 -10 -10 -10 -10 -10 -

			46 - 20 = 26 26 - 5 = 21 46 - 25 = 21
Subtracting a 2-digit number using place value and columns	Subtract the 1s. Then subtract the 10s. This may be done in or out of a place value grid. $\begin{array}{c c} \hline T & O \\ \hline & & & \\ \hline \end{array} \\ \hline & & & \\ \hline \hline & & & \\ \hline \hline \\ \hline & & & \\ \hline \hline \\ \hline & & & \\ \hline \hline \\ \hline \hline \\ \hline & & & \\ \hline \hline \hline \\ \hline \hline \\ \hline \hline \hline \hline \\ \hline \hline \hline \hline \\ \hline \hline$	Subtract the 1s. Then subtract the 10s.	Using column subtraction, subtract the 1s. Then subtract the 10s. $\begin{array}{r} T \\ 0 \\ 4 \\ 5 \\ -1 \\ 2 \\ 3 \\ \end{array}$
Subtracting a 2-digit number with exchange		Exchange 1 ten for 10 ones. Then subtract the 1s. Then subtract the 10s.	Using column subtraction, exchange 1 ten for 10 ones. Then subtract the 1s. Then subtract the 10s.

Year 2 Multiplication		Tens Ones Tens Tens Tens <th>$\begin{array}{c ccccccccccccccccccccccccccccccccccc$</th>	$ \begin{array}{c ccccccccccccccccccccccccccccccccccc$
Equal groups and repeated addition	Recognise equal groups and write as repeated addition and as multiplication.	Recognise equal groups using standard objects such as counters and write as repeated addition and multiplication.	Use a number line and write as repeated addition and as multiplication. $\begin{array}{c} & & \\$
Using arrays to represent multiplication	Understand the relationship between arrays, multiplication and repeated addition.	Understand the relationship between arrays, multiplication and repeated addition.	Understand the relationship between arrays, multiplication and repeated addition.

and support understanding	4 groups of 5	4 groups of 5 5 groups of 5	0 5 10 15 20 25 5 × 5 = 25
Understanding commutativity	Use arrays to visualise commutativity.	Form arrays using counters to visualise commutativity. Rotate the array to show that orientation does not change the multiplication. This is 2 groups of 6 and also 6 groups of 2.	Use arrays to visualise commutativity. 4 + 4 + 4 + 4 + 4 = 20 5 + 5 + 5 = 20 4 + 20 4 + 4 + 4 + 4 = 20
Learning ×2, ×5 and ×10 table facts	Develop an understanding of how to unitise groups of 2, 5 and 10 and learn corresponding times-table facts.	Understand how to relate counting in unitised groups and repeated addition with knowing key times-table facts.	Understand how the times-tables increase and contain patterns.

	3 groups of 10 10, 20, 30 3 x 10 = 30	$ \begin{array}{l} 10 + 10 + 10 = 30 \\ 3 \times 10 = 30 \end{array} $	10 10 10 10 10 10 10 10
Year 2 Division			

Sharing Represent the objects shared into equal Start with a whole and share into equal Use a bar model to support understanding equally parts using a bar model. of the division. parts, one at a time. 000000000000 18 20 shared into 5 equal parts. $18 \div 2 = 9$ There are 4 in each part. 12 shared equally between 2. They get 6 each. Start to understand how this also relates to grouping. To share equally between 3 people, take a group of 3 and give 1 to each person. Keep going until all the objects have been shared 燲 爱爱爱 爱爱爱爱 爱爱爱 爱爱爱 **** **** 15 They get 5 💬 each. 15 shared equally between 3. They get 5 each. Understand the relationship between Grouping Understand how to make equal groups from Understand how to relate division by equally a whole. grouping and the division statements. grouping to repeated subtraction.

	Image: Second Structure Image: Second Structure <th>$12 \div 3 = 4$ $12 \div 4 = 3$ $12 \div 6 = 2$ $12 \div 2 = 6$</th> <th>There are 4 groups of 3. $12 \div 3 = 4$ There are 4 groups.</th>	$12 \div 3 = 4$ $12 \div 4 = 3$ $12 \div 6 = 2$ $12 \div 2 = 6$	There are 4 groups of 3. $12 \div 3 = 4$ There are 4 groups.
Using known times-tables to solve divisions	Understand the relationship between multiplication facts and division.	Link equal grouping with repeated subtraction and known times-table facts to support division. <i>40 divided by 4 is 10.</i> Use a bar model to support understanding of the link between times-table knowledge and division.	Relate times-table knowledge directly to division. $I \times I0 = I0$ $2 \times I0 = 20$ $3 \times I0 = 30$ $4 \times I0 = 40$ $5 \times I0 = 50$ $6 \times I0 = 60$ $7 \times I0 = 70$ $8 \times I0 = 80$ I know that 3 groups of 10 makes 30, so I know that 30 divided by 10 is 3. $3 \times 10 = 30$ so $30 \div 10 = 3$
