

Are all settlements the same?

What I have already learned

I know

- in geography human features are built by humans
- in geography physical features are naturally occur
- the seven continents on planet Earth
- England is a country in the United Kingdom and so are Scotland, Wales and Northern Ireland
- a long time ago people lived in caves and then began to live together in settlements

Human features: built by people (roads, houses and bridges)

Physical features: are landforms that occur naturally (rivers, forests, hills and beaches)

Key Vocabulary

settlement	A community where people live
community	A group of people living in a particular area.
urban	Busy places with many buildings and lots of people, like a city
rural	A places with lots of open space, farms, and fewer people, like a small town or countryside area
pattern	Something that happens regularly in a repeated way

What I will learn

I will learn

- that settlements are communities where people live
- about the three main types of settlement: village, town and city
- how communities use land to live, transport, farm, sell and enjoy
- that settlement patterns can be arranged in a linear, nucleated and dispersed way
