

What are rivers and how are they used?

Geography Knowledge Organiser

What I have already learned

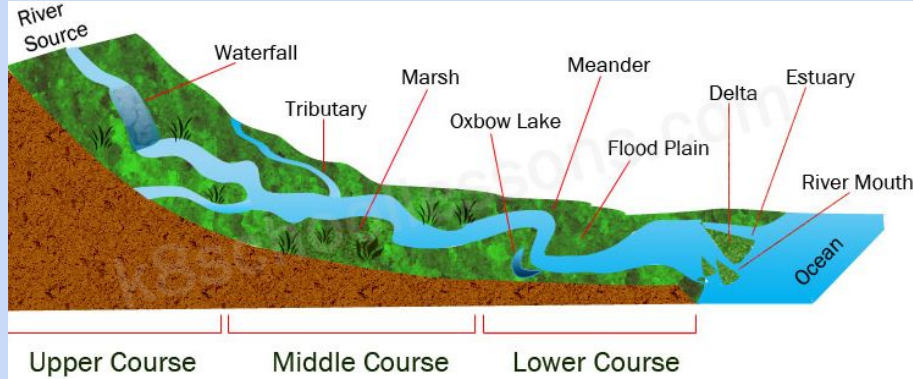

I know

- the names of the seven continents and five oceans
- the UK is an island and there are different bodies of water around it: English Channel, North Sea, Irish Sea and Atlantic Ocean

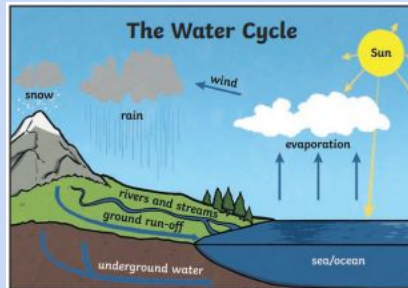

What I will learn

I will learn

- to understand the river journey from source to mouth
- why the River Thames is very important to London
- how we use rivers
- the causes and effects of pollution in our rivers and oceans
- to understand the Water Cycle

Features of a river

Key Vocabulary

Physical geography	Studying the Earth's natural surface e.g. rivers or continents
Human geography	Studying where people live, what they do and how they live e.g. towns or cultures
Sustainable	Making sure our resources last us for many years to come
Global	When something has to do with the whole earth
mouth	The point where a river joins the sea.
source	The place where a river begins.
tributaries	Rivers that join up with another river.
